Enhancing Collaboration, Empowering Businesses.

www.godrejavsolutions.com

Godrej AV Solutions

Godrej AV Solutions, one of the most experienced and leading audio visual solutions provider, brings audio visual products and solutions that seamlessly integrates audio, video, display, lighting equipment and system controls for applications such as boardrooms, conference rooms, auditoriums, training rooms, cafeterias, telepresence rooms and much more. Our partnership with leading AV product manufacturers across the world, enable us to offer state-of-the-art products and solutions.

With pan India presence and team of around 230 professionals, Godrej AV Solutions helps organizations in enhancing collaboration with enriching experience. Our team consists of some of the most experienced audio visual integration specialists in the industry and several Godrej AV Solutions specialists hold international certifications and awards.

With a focus on global consistency and quality, Godrej AV Solutions is the exclusive India member of the Global Presence Alliance (GPA) – a network of specialist audio, video and unified communication companies that streamline how people work together across the world.

Markets - Our Industry Expertise

Godrej AV Solutions offers audio visual solutions for various market verticals in India. Being a leading audio visual solutions provider, we provide solutions to market verticals such as education, enterprise, BFSI, government, defence, healthcare and hospitality.

Our expert designers and sales consultants ensure that needs and expectations of different market verticals are well understood and solutions are designed and implemented accordingly. Our solutions ensure that right collaboration and communication tools are provided according to each vertical need.

Our solutions help customers in enhancing collaboration, improve operational efficiency and productivity.

Our Solutions Offering

Effective communication is a key to success of business processes for any organisation. It helps organisations across market verticals in managing, collaborating and inspiring people.

We, at Godrej AV Solutions help organisations with state-of-the-art audio visual solutions which help in enhancing collaboration and improving productivity. Our experienced sales and design consultants fully understand the needs and expectations of customers and offer innovative solutions that seamlessly integrate audio, video, display, lighting equipment and system control for all enterprise collaboration applications.

Boardroom / Conference / Huddle Room

We understand the collaboration needs of modern organizations and offer solutions to meet those needs. A typical state-of-the-art boardroom / conference / huddle room integrates various technologies like audio, video, display, lighting and system control to function effectively.

Digital Classroom / Training Room

We help organizations in upgrading traditional classrooms / training rooms into dynamic learning environment by selecting the right technology in line with the need. Our solutions achieve unique requirements of each customer, encourage collaboration and improve effectiveness of every interactive learning environment.

Visual Communication / Immersive Telepresence – Video Conferencing

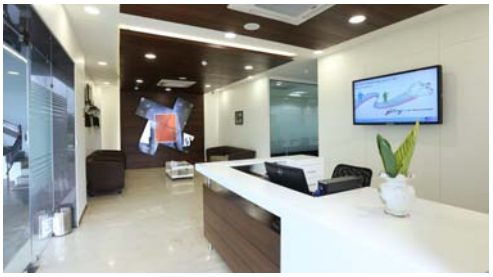
As one of the most experienced and a market leader in providing visual communication solutions, we bring host of visual collaboration solutions for our customers. Our relationship with leading technology providers like Cisco, Polycom and LifeSize helps in bringing the right solutions to our customers.

Recording, Streaming and Content Management

We offer recording, streaming and content management solutions which maximizes the impact, reach and value of media. Our expert design and sales consultants will understand your requirement and develop an appropriate solution.

Information Display (Digital Signage)

Godrej AV Solutions, through its relationship with leading players in the industry like 3M, Samsung, Panasonic and Scala brings you wide range of solutions. Our solutions help organisations to deliver a variety of dynamic information using audio, video, still, or moving images to their target audience.



Video Wall Display

We offer video wall solutions from leading manufacturers like BARCO, Christie, Panasonic, Samsung etc. Our team with experience of having installed some of the largest video wall solutions in India will help in choosing the most appropriate solution for your requirement. Our solutions offer right choice of technology, high reliability and ease of use.

Paging and Background Music

We understand the specific needs of customers and help them with the optimum design for the audio requirement. Our key focus in an audio design is superior experience to the user, convenience to the operator and best return on investment.

Auditorium / Seminar Hall

We understand the audio visual facility requirement of modern auditoriums and help organisations to set up a state of the art auditorium facility with latest audio visual technologies. Our certified design consultants ensure that the modern auditorium requirements such as projection display, sound reinforcement, acoustic treatment, lighting and peripheral connectivity are well understood and right solution is designed to meet expectations of all stake holders.

Experience Centre

We help organizations to design and implement innovative and unique audio visual solutions that deliver exceptional interactive experience for visitors by incorporating some of the world's most advanced audio visual technologies.

Cafeteria / Break-out Room

A perfectly design and implemented audio visual solution plays a major role in making up cafeterias / break-out room's employee friendly. Sometimes, these locations also double up as meeting places when an organization wants to communicate with larger group of employees or use as venue for large gathering of employees.

Centralised Monitoring and Management

It is important that system and technology that typically operate in silos required to be integrated so that they work together as a single cohesive system. Our centralised monitoring and management solutions help organizations with powerful tools such as centralised device management, room scheduling, remote helpdesk and data collection and reporting.

Services

Consultancy and Design

- Godrej AV Solutions offers consultancy and design services to customers, architects, project management organisations through a team of certified experts.
- We help customers in evaluation of audio visual need, understanding technology and its applications, development of functional designs and finalising bill of materials.

Project Management

- With a team of certified project management professionals, Godrej AV Solutions is committed to its customers for efficient and on time project integration and implementation.
- Godrej AV Solutions project managers ensures proper understanding of the project scope, schedule, resource requirement, risks etc so that they can deliver the project on time and ensure quality outcome.

Technology and Application Training

- The most important phase of AV project implementation is technology and application training of solution implemented to end users. It is very critical that end users properly understand the facility and know how to use the same for best outcomes.
- Our project managers and engineers ensure that effective end user training process is followed which includes understanding of training requirement, preparation of training manual, providing effective training to both users and the nominated administrators.

Project Support and Maintenance

- Godrej AV Solutions understands the criticality of AV system for business and our processes are tuned to provide prompt and reliable after sales support through a team of certified engineers. Our Pan India presence helps our customers to receive uniformly high standard service across the country.
- To ensure long term maintenance and upkeep of the equipment of our customers, Godrej AV Solutions offers annual maintenance contract. We offer various types of service contract options to ensure high uptime for our customers.

Technology Upgrade

- With the continuously changing technology environment, it is most important for the clients to ensure that their AV facility is upgraded to latest technology to derive the best out of technological advancements. It is very important for clients to continually upgrade their AV technology across all facilities.
- We at Godrej AV Solutions ensure that the rapid changes in AV technologies are continuously monitored, understood and new solutions are developed and offer upgrade programmes to our clients.

MINGLE
CONFERENCING SOLUTIONS

Tailor make your conference rooms to suit your business needs

Innovative new technologies are transforming conference rooms into collaborative environments that foster creativity, boost productivity and give businesses a competitive edge with a connected workforce. More organisations are tailoring their meeting rooms to specific types of meetings.

A well-designed conference room takes into account the gadgets to be used, distance from screen, personal space and leg space each user will need, etc. All these factors determine the comfort of a conference room.

A well planned and equipped conference room with the latest AV and networking technology compatibility goes a long way in keeping the workforce productive, connected and inspired.
