

Flexible. Customizable. Upgradable.

Beds for modern healing spaces.

ACURA

The making of Acura

To understand the nature of 'care', Godrej Interio's Healthcare team has conducted a deep-dive and immersive research to understand the Indian consumer - his expectations, challenges & overall psyche.

ACURA

Where design, innovation and healthcare converge

A platform-based range of hospital beds, Acura is designed to offer care, comfort and ease of operation at every stage. This range gives you 'Buy what you need' options for varying needs of different hospital environments.

Configured to your needs

Allows you to choose from a menu of options to configure bed according to your needs.

Bed Upgrades: Now Onsite & Easy

Acura beds come with the flexibility of converting manual functions to motorized ones with help of retrofit electronics kit on-site without making any structural changes in the bed. With this retrofit electronic kit, the manual functions of Back Rest, Leg Rest & Height Adjustment can be motorized at site in a few hours, thereby minimizing downtime, customer spend and associated environmental impact.

A more efficient product lifecycle

No reworks, no replacements. Acura offers the customer a financially more attractive solution to shift from manual to motorized. This solution will eliminate entire process of new product replacement; while saving on manufacturing, transportation and installment resources.

Range of finishes & functionalities

From the initial choice of finishes to a range of functionalities, Acura is designed to give you choice. The result is a bed that can adapt to the needs of an expanding healthcare facility across years.

An example of Innovation in design engineering

Godrej Interio designers and engineers have created a new high performance adaptive bed platform, led by innovation in design engineering and implementation processes. The onsite upgradability feature in Acura has been patented.

Acura Beds

The smarter way to upgrade.

Unique platform range of beds
4 varieties of sideboard configurations
Onsite upgradability from manual to motorized

What makes the Acura 'Manual to Motorized' Range unique is the facility provided in the bed frame to shift from the manual crank adjustment to motorized adjustments, easily and quickly, onsite. This product range provides you a wide choice of hospital beds, that offer upgrade features making it the preferred choice for fast growing healthcare spaces.

Buy as you need, upgrade at your convenience

Start with bed having manual features

Purchase Acura Actuator System

Acura
Greater comfort,
greater efficiency.

Safety & comfort for patient.
High hygiene & ease of use for caregivers.
Premium aesthetics & a choice of options
for Hospital management.

Healthcare spaces today are expected to deliver at the highest standards of comfort, safety, efficiency and aesthetics. With minute attention to detail, we have designed Acura to meet the needs of various healthcare stakeholders. Confidently moving towards responsive healing spaces.

Acura Neo

Highly functional,
upgradable onsite.

A contemporary 5F manual functional bed offers full coverage sideboards, ensuring patient safety at all times. Acura Neo can be upgraded from manual to semi motorized at your site.

Acura Lite

Sleek, compact
& comfortable.

This standard bed is designed to fit into compact spaces and deliver necessary patient support and hygiene. With fixed metal lying surface and siderails for patient support, it is ideal for primary healthcare spaces.

*Also available in semi motorized variant.

The finer details

125 mm Castors* with diagonal locking:
Maneuverability is easier with 125 mm castors, making it easy for caregivers to mobilize patient, quickly.

Bumpers with excellent shock absorbing property:
Keep the bed safe, provide protection against collisions during shifting of bed.

Provision for Lite IV Pole:
Provision for IV pole on all four corners of bed.

Urine Bag Holder:
MS hooks have been provided as urine bag holders on either side of bed, for ease of accessibility.

Emergency CPR Lever:
Helps achieve flat position of backrest in case of emergency, from either side of the bed.

Leg Elevation:
Simple single hand operation to achieve leg elevation in case of DVT.

Crank handle parking:
The ergonomic crank handle can be safely placed at its dedicated safe parking position to avoid misplacement.

* Twin Wheel & Single Wheel Castor options available.

Safety

Full Coverage Safety Sideboards: Patient safety is at the core of our design. The full coverage sideboards provide utmost safety and make patient handling easier.

Zero Entrapment zones: IEC - 60601-2-52 Safety Standards compliant, ensures body parts of caregivers and patient are safe at all times.

Separate angle indicator for headboard and footboard: Caregiver has access to angle readings of bed at all times, helps in achieving safe position for patient.

Hygiene

Removable Lying surfaces: The removable PP lying panels make cleaning and maintaining high hygiene standards easier.

Note: Acura Neo and Acura Lite come with fixed metal lying surfaces, that can be cleaned with standard cleaning materials.

Removable Plastic Headboard & Footboard: For easy cleaning or in case of emergencies.

Adequate Under-bed clearance: The optimum Under-bed clearance (>15 cm) ensures unobstructed placement of medical equipment under the bed; ease of bed maintenance.

Side Support

Our wide range of sideboards and siderails options gives you the opportunity to create safe healthcare spaces with new age aesthetics. Choose the ones best suited to your hospital environment and patient needs.

Plastic Sideboards

Provide full coverage with drop down mechanism. The sideboards, with superior surface texture and finish, are **rotatable** with back rest.

Aluminium Sideboards

Provide full coverage with drop down mechanism. The sideboards with classic Aluminium touch in matte finish give the bed a novel look.

Aluminium Siderails

Provide 3/4th coverage with drop down mechanism. These siderails provide a distinct look to the bed, while meeting the standards of patient safety.

MS Siderails

The MS powder coated collapsible siderails provide optimum coverage with swing side mechanism. Lowering the siderails vertically is easy which makes it ideal for use in confined spaces.

Accessories

Actuator Kit: The retrofit Actuator Kit is used to upgrade the bed features from manual to motorized.

Oxygen cylinder holder
Supports mobile respirator with spontaneous breathing mode.

Lite IV Pole
Ergonomic SS IV pole, easy to use at any bed corner.

Mattress
Patient responsive mattress is the ideal match, facilitating comfort and quick recovery.

X-ray permeable back
Eliminates the need to shift patient for X-ray purposes, reduces stress on patient and caregiver.

Battery backup
When motorized beds are unplugged from power source, all bed functions can be supported with battery backup. This makes it easy to shift bed across wards and floors.
