About Godrej Interio | Healthcare

Godrej Interio | Healthcare has been conceptualising, developing and providing ergonomic furniture to healthcare spaces since 2008, across India. With a focus on creating thoughtful, supportive and healing environments, Godrej Interio | Healthcare offers beds, storages and accessories for ICU, Ward, Operating Theaters and OPD spaces.

As with all Godrej Interio range of products, our Healthcare range too is designed to international quality, ergonomic and safety standards. The Godrej Interio Grace Homecare Bed is the latest offering in the Healthcare range. Designed to make recuperating at home more comfortable, Grace Homecare Bed could be just what you need to give your loved ones that special care.

Grace homecare bed

Designed to care

Having a loved one fall ill for long periods of time, or taking care of a parent dealing with the various health challenges that come with age can be trying not only for the patient, but for the family as a whole.

The patient's discomfort is further compounded by long stays in hospitals, often just to recover from the most recent medical casualty.

It is to ease these concerns and make the recovery process smoother and more comfortable that Godrej Interio | Healthcare offers Grace Homecare Bed. This elegant feature-rich bed allows families to care for their loved ones in the comfort of their home, offering all the conveniences of a hospital bed.

Ideal for

- People in the age group of 60 years or older, makes geriatric care easier.
- Patients recovering from major surgeries or critical health conditions.
- Individuals suffering from chronic, physical and/or mental health diseases and disabilities.
- People who need palliative care and assistance to be comfortable in the end stages of life.

Meeting patient needs with contemporary aesthetics

Grace Homecare Bed is designed to make your loved one feel cared for, while fitting in beautifully with your interiors.

Technology that calms

The back rest and leg rest can be electronically adjusted with the hand control device, facilitating ease of movement and alternate sitting and lying postures.

Looks that please

The elegant aesthetics of the bed minimise the 'hospital feel' and blend in seamlessly with contemporary and classic home decor. Made from PLT (engineered wood) panels, the headboard, legboard and side panels are available in two warm, natural wood shades.

The anodized aluminium finish on the side rails enhances the premium feel. Enclosed box design keeps the under structure out of view, to avoid misuse and accidents.

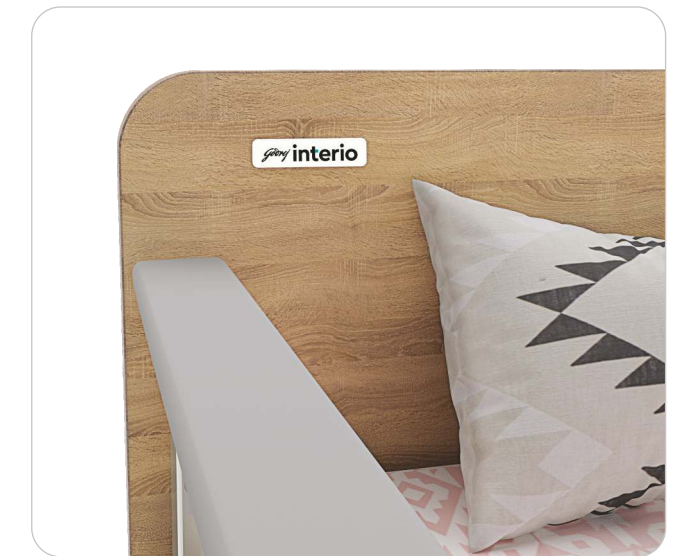

Keep your loved one safe at all times

Considering the varying levels of patient mobility, Grace Homecare Bed has been designed to deliver utmost safety and stability in all positions. The key safety features include full length side railings, ergonomic design and provision of DVT position.

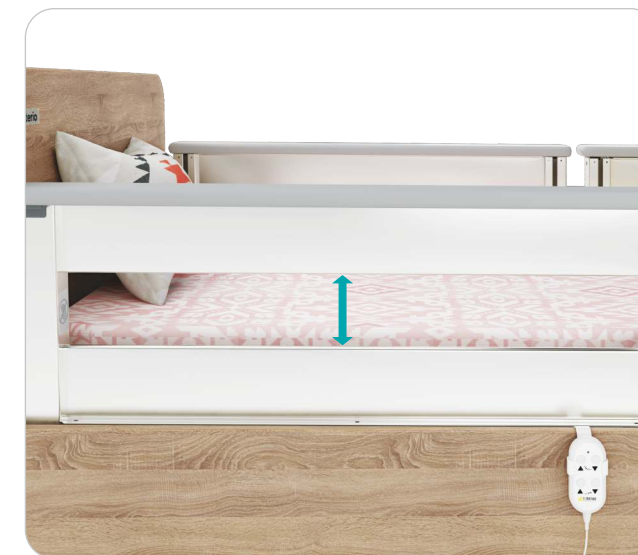

Grace Homecare Bed offers the DVT position, wherein, leg rest is raised and back rest is in flat position resulting in elevation of legs which aids in better blood circulation, preventing clots and swelling. **About Deep Vein Thrombosis (DVT):** This is a medical condition that occurs when a blood clot forms in a deep vein, usually in a leg due to prolonged bed rest or immobility.

Full length split telescopic side rail for protection, to prevent falls.

Rounded corners to prevent injury.

100 mm gap between edges of siderails for visibility, and to avoid claustrophobic feeling in the patient.

Entrapment safe ergonomic design.

Grace Homecare Bed is a feature-loaded bed, designed to make homecare safe and convenient for the patient and caregiver.

- The full split length side railings keep the patient safe during caregiver interactions and allow for uninterrupted and peaceful periods of rest.
- The bed height at 45 cm with mattress ensures comfort and safety during egress and mounting the bed. This height also makes it convenient for the caregiver to assist the resident at all times.
- Further, ergonomic design of parts keeps the resident and caregiver safe from entrapments, irrespective of bed position.

High functionality ensures easy handling

Looking after a loved one who needs constant care and monitoring does not have to be difficult or strenuous.

Simple operations

Grace Homecare Bed has an easy to operate mechanism that enables family to assist the resident at all times. Designed for homes, the bed operations are intuitive and hassle free. The bed can be adjusted to three positions: raised backrest, raised leg rest and back rest and only leg rest raised.

Ergonomic design facilitates flexibility

Grace has rounded bed edges and 450 mm bed height with mattress. This optimum height assists in transfer of patient from bed to wheelchair safely, and minimises patient falls.

The bed can be easily maneuvered with the hand remote control device.

For patient convenience, both remote and urine bag holder can be mounted on either side of the bed.

Easy to clean and maintain

The lying surface comprises of removable PP injection moulded parts that are easy to clean and maintain over the years. Split in four sections, back rest, pelvic, upper leg rest and lower leg rest, the bed is designed for utmost patient comfort and helps prevent excessive pressure during sitting up positions.

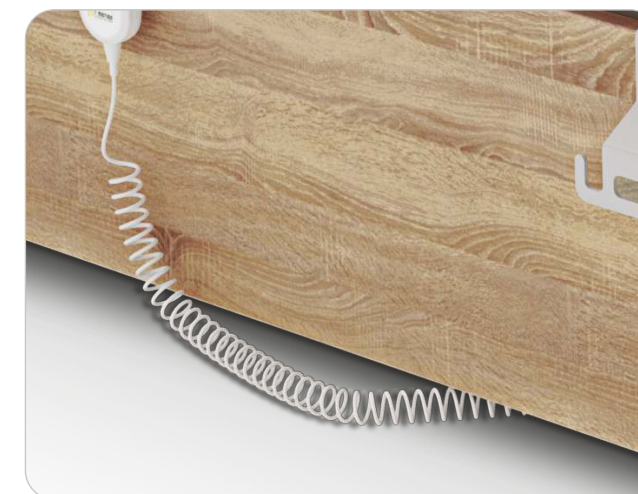

Mobilising side rail system: The side rail system can be operated by pressing the buttons present at the end of each side rail. This must be operated using both hands.

DVT position: Electronically adjustable back rest and leg rest; DVT position available.

Remote Control: Easy to use, two buttons for up & down function of backrest and leg rest.

Spiral wire: Minimises entanglement, keeps area neat.

Urine bag holder: Separate attachment hooks onto PLT; either on left or right.

Why Grace Homecare Bed makes good sense

While our healthcare services today are well advanced, it is important to realise that with growing years, our loved ones will need hospital-like care even at home.

It is to address such needs that Godrej Interio | Healthcare has launched Grace Homecare Bed. Creating an ambience of comfort and healing is the first step towards having your loved one begin to feel better. Whether your family member is dealing with the physical and mental changes that come with ageing, or you have someone recovering from a surgery or an illness, having the right bed for your patient can make a huge difference.
